**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 7, 2005 has been entered.

### ***Response to Amendment***

In response to the Final Office Action dated April 7, 2005, independent claim 1 has been amended.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-13 have been fully considered and are persuasive. The rejections of claims 1-13 have been withdrawn.

### ***Claim Rejections***

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

**Claim 1-13** are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 1 provides for the amended limitations "wherein the camera support means are located on a first end and a second end of the electronic camera" and "wherein  $\theta_b$  is a range from  $30^\circ$  on a front side of the electronic apparatus to  $105^\circ$  on a rear side of the electronic apparatus". However, review of the specification shows that these limitations are derived from distinct embodiments, and due to the divergent nature of these embodiments, are mutually exclusive; with the first amended limitation being associated with the first embodiment which describes a camera integrated into the upper frame via first and second end support means (figs. 2 and 3), and having a limited range of motion covering up to but not beyond  $180^\circ$  (fig. 3) that is contradictory with the range presented by the second amended limitation, which is associated with the second embodiment (figs. 7, 8, and 9, ¶0054.)

Claims 2-13 each depend either directly from or indirectly from independent claim 1, and thus inherit all the limitations of independent claim 1. Consequently, based on their dependence and the foregoing 35 U.S.C. 112, first paragraph rejection to claim 1, claims 2-13 are also rejected under the same grounds of failing to comply with the written description requirement.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Siddoway et al. (US 6,647,631) discloses a camera which includes camera  
5 support means that are located on a first end and a second end of an electronic camera, and which operates over a 180° range.

Arai et al. (US 6,904,289) discloses a camera which includes camera support means that are located on a first end and a second end of an electronic camera.

Wakabayashi et al. (JP 08-223492) discloses a camera which includes camera  
10 support means that are located on a first end and a second end of an electronic camera, as well as image inversion based on the angular position of the camera within a range from approximately 45° on a front side of a camera to approximately 120° on a rear side of a camera.
